

CALCLEAR

COMPUTERISED WATER CONDITIONERS

CALCLEAR Water – Agricultural Application and Results

IONISE and soften water –
minerals kept in solution

Inhibits scale formation and algae
Drippers, channels, sprays and misters

Enhances transpiration, minerals and
xylem uptake to leaf tips extends

High quality crops every day

CALCLEAR increases Calcium uptake,
Brix levels. Reduces tip burn and
Blossom end rot

Reduce maintenance cleaning drippers,
channels. Increase marketable crop
size, fruiting and quality

USA Research - Faster grow, increase
number of crops and value. Consistent
quality increase in biomass and
concentrates, nodes, smell, colour
