

CALCLEAR WATER

DESCALING WATER PROCESS SYSTEMS

About our Systems

The **CALCLEAR** EMF technology works by changing the mineral crystals in water into tiny particles to reduce scale formation.

CALCLEAR offers a pre-treatment that is both prevention and cure for most of the scaling and corrosion problems caused by water in industry, commerce, agriculture and in the home.

Watch the videos and download the support documentation, as seen at **OzWater 2013** simply visit our website:

CALCLEAR WATER

DESCALING WATER PROCESS SYSTEMS

Curlewis NSW Testimonials

A town of 150 households has a **CALCLEAR** installed to soften heavily mineralised water.

BEFORE installation of **CALCLEAR** in 2007:

"Calcium has ruined our evaporative cooler, bathroom and gutters. We have lived here for 31 years, over the years it's got so bad we can't drink it, our skin is hard and scratchy. All the kids around here have skin problems."

Wayne & Wendy Scach, 32 Pike Street

6 Weeks AFTER installation of **CALCLEAR**

"My plant garden has improved with quicker new growth. My hair feels softer and the washing water suds better."

C. Fordham, 16 Gordon Street

"Water tastes nice. Dogs will now drink it too!"

Kevin Brett

CALCLEAR WATER

DESCALING WATER PROCESS SYSTEMS

Lower your Capex

Affordable, small capital outlay as a hard water pre-treatment to reduce scale and reduce need for anti-scalant chemicals and softener equipment. Labour and maintenance costs are reduced.

Reduce your Opex

Economical, no more need for salt or anti-scaling chemical dosing. Cost of power, downtime for operations and plumbing maintenance reduced.

Environmentally Friendly

CALCLEAR provides **CHEMICAL FREE** solutions for hard water residential, commercial, agricultural and industrial water treatment.
